

BioSkills Practical Aspects: Zimmer Biomet TM[™] Total Ankle Arthroplasty

Hands on - Ankle

Anatomisches Institut der Universität Tübingen Tübingen, Germany 26 - 27 March 2018

BioSkills

Life is all about activity. At Zimmer Biomet Institute we therefore believe our delegates should play an active part when learning about new products, surgical techniques or the like. Get your hands and brains on human specimens, sawbones and instruments to deepen your knowledge and enhance your skills!

The specific course objectives include:

- Discuss appropriate patient selection, indications, approaches and implant use
- Interact and discuss cases with expert Faculty and colleagues
- Review the practical and technical aspects of Total Ankle Arthroplasty and the Zimmer Biomet Tracebular Metal™ Total Ankle Prosthesis
- Perform the operation using anatomical specimens

The primary aim of the course is to ensure the safe and effective use of Zimmer Biomet implants.

Delegates are kindly invited to bring a case which can be discussed with a Faculty member.

Zimmer Biomet Institute

Our continuum of education offers a vast range of opportunities to health care providers and Zimmer Biomet team members to **learn**, **interact**, **understand** and **share** knowledge about our products, services and about surgical philosophies through a variety of modalities.

Program

Monday 26 March 2018 **Hotel Krone** 15:00 Registration 15:30 Course Welcome ZBI 15:45 TM Ankle Design Rationale L. Schon 16:10 Indications, Planning & Approach F. Usuelli 16:35 OR Technique L.
